CULTURE SUGGESTIONS

Work soil at least 18 inches deep; use liberal amount of well decayed manure. Cow manure is best. Use sprinkling of lime and bone; Soak seed in water for about 24 hours or until swelled up and then plant about 1½ to 2 inches deep in a well firmed soil that is good and moist, but not sticky. (DO NOT SOAK WHITE SEEDED VARIETIES).

In recent years a copper oxide preparation has frequently been dusted on sweet pea seeds to prevent damping off, the same proving very satisfactory. This can be procured at most seed stores under various names. Inoculation of seed is also highly successful.

Peas will not do well in too loose a soil. Plant one inch apart and later thin to about six inches. Do not water until seeds have begun to germinate. After germination has taken place give good soaking. MOST FAILURES ARE CAUSED BY WATERING BEFORE SEED HAS SPROUTED. If weather is hot use some kind of shading. Protect young plants from birds outdoors. Look for Green Aphids regularly as this insect is the worst enemy. Spraying with nicotine, one part nicotine to 400 parts water with spray gun is best. There are also many other good insecticides which are excellent for the control of Aphids. Give young plants substantial supports in order that they may climb and produce good flowers. Poor flowers with crooked stems are worthless. Liquid manure feeding after they come in bloom will lengthen the flowering period and produce better flowers. Pick all flowers as this also lengthens the flowering period. Always keep the surface earth loose and never allow a crust to form. If grown indoors keep ventilators open to keep the air as dry as possible. A house that is kept damp and sultry will cause too much growth and the sweet peas will not bloom as soon as they should, and then will begin to bloom too high up. Early sweet peas usually bloom from 75 to 100 days after seed is planted. Many nurseries start sweet pea seeds by germinating in Vermiculite and then selling germinated seed or pot them for sale.

CONDITIONS OF SALE

THE ZVOLANEK SWEET PEA

Early - Semi-early (spring-flowering) and summer-flowering

This is the super sweet pea of the future. During the next ten years all sweet peas: early, semi-early (spring flowering) and summer-flowering will all be the Zvolanek Sweet Pea introduced by William Zvolanek in 1950. Last year, 1950, we introduced the first five varieties of this multi-flowered type in early-flowering and from all reports we have had they are excellent and have no equal. We have now many colors and it is only a matter of production until we have a full range of colors on the market. This year we will introduce at least two—possibly three new colors. We also have a good start on the semi-early (spring-flowering) in about ten colors and about twenty colors in the summer-flowering in our trial grounds. These will be in production soon. This new William Zvolanek Sweet Pea usually starts with four and five flowers and steps up to six, seven and eight flowers. Stems on this type are unusually long; some with heavy long pencil stems and others with long wiry stems. Many varieties are also highly fragrant which is very rare in the older types.

Why grow the older types when the Zvolanek type will give you larger bunches, longer stems, fragrance and a multitude of flowers on a stem.

Ant. C. Zvolanek, father of William Zvolanek, introduced the first early-flowering Grandiflora Sweet Pea in about 1890. These were the small sweet pea with two to three flowers on a stem, and again in 1918 introduced the Early Spencer history making Zvolanek's Rose which had the longest run of any sweet pea in existence. Since then sweet peas have been about standard with two, three and four flowers on a stem. Now the William Zvolanek Sweet Pea of 1950, the multi-flowered sweet pea of the future is the coming sweet pea. Again a Zvolanek triumph.

AGAIN THE BEST — ZVOLANEK'S.

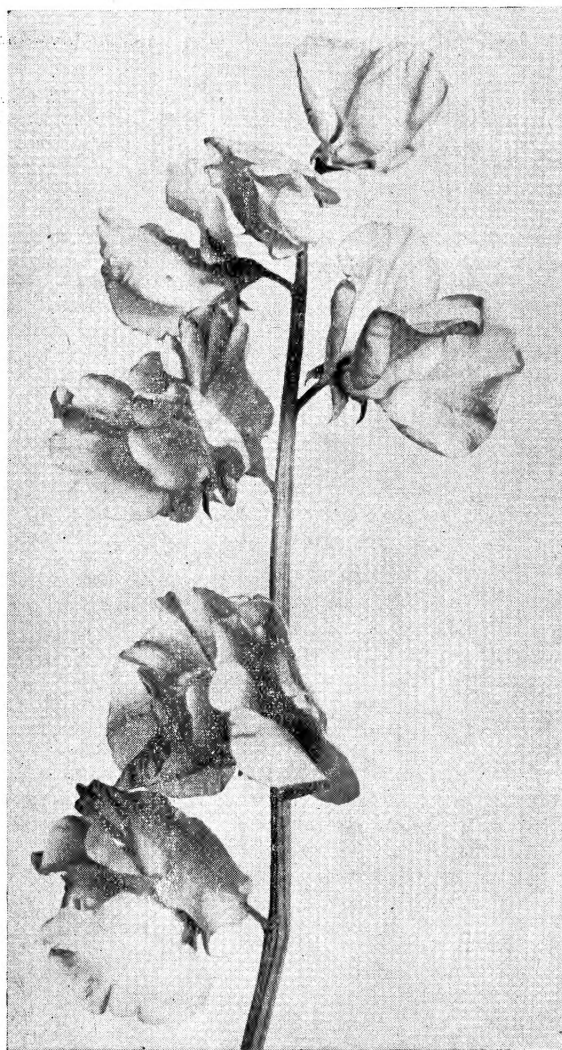

Sincerely yours,

WILLIAM ZVOLANEK & COMPANY,

William Zvolanek, Prop.

The Talk of All Cut Flower Growers and Seedsmen.

Bigger bunches, longer stems, more and larger flowers.

UNSOLICITED LETTERS

Dear Sirs:

We bought (Zvolanek's Multi-Flowered) Sweet Pea Seeds last year and at the present time they are flowering. We are very pleased with the quality of sweet peas we are getting off of these vines and we would like to place an order for the coming year. Any one or different varieties which you may have, we would certainly appreciate descriptive information and prices.

HARRISON-LEHMAN & CO.

Sioux City, Iowa.

Dear Mr. Zvolanek:

Just a note to let you know that I had a nice crop of Sweet Peas (Colossal) and the finest Larkspur I've ever seen from the seeds I ordered last fall. The results from the seeds were excellent.
